The Only Chassis Made Exclusively for Motorhomes

We didn't take the easy route and modify a truck chassis for our partners at Entegra. We knew they wanted an unmatched ride that was as smooth and quiet as it was invigorating and well appointed. So we built them a unique chassis from the ground up, designed and engineered to connect the road to the driver with a ride that responds more like a luxury SUV than a truck. And with Spartan's industry-leading Advanced Protection System®, you'll feel safer than ever.

Entegra's luxury Class A Coaches are built on Spartan chassis. Designed, engineered and made in America with the finest components to create a premier foundation for the world's most demanding RV makers and owners.

The highest quality materials provide reliability and dependability, along with nationwide service, and the best warranty in the business. Motorhomes riding on Spartan chassis are built with care to stay on the road for a good, long time.
